Release Notes for IWFM Version 3.02.193

(Emin Can Dogrul; DWR)

This version of IWFM includes the following changes:

1. (3/7/2017) An array assignment in the code was creating an error when the source code was compiled with the new Intel Fortran compiler. The source code is modified to avoid this error.

2. (4/24/2017) In Budget post-processor when generating the diversion details budget output, if there were no deliveries/diversions to/from a subregion, an error was occurring. This is corrected.
